

Schleibinger Geräte Teubert u. Greim GmbH

- Founded 1989 by O. Teubert and M. Greim and A.Schleibinger.
- Since 1995 owned by M.Greim and O.Teubert
- We are developing, building and selling innovative test systems for building materials.
- With 9 employees we now supply our customers worldwide with systems for enviromental simulation, deformation measurement, and rheometrical tests.
- In cooperation with our customers we are developing new test systems for the building materials of the future

Schleibinger in Buchbach/Germany

Buchbach

70 km east of Munich

Our Products

- CDF- and Slab-Tester
- Shrinkage testing equipment
- Viskometer

- Maturity Measurement
- Special Applications

Some of our Customers...

HEIDELBERGCEMENT

BASF
The Chemical Company

Materials Science & Technology

Bauhaus-Universität

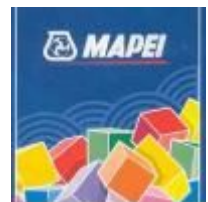

Italcementi Group

der Bundeswehr
Universität **München**

Verein Deutscher Zementwerke e.V.
Forschungsinstitut der Zementindustrie

Total Turnover

Aggregate Reactivity Tester - Standards

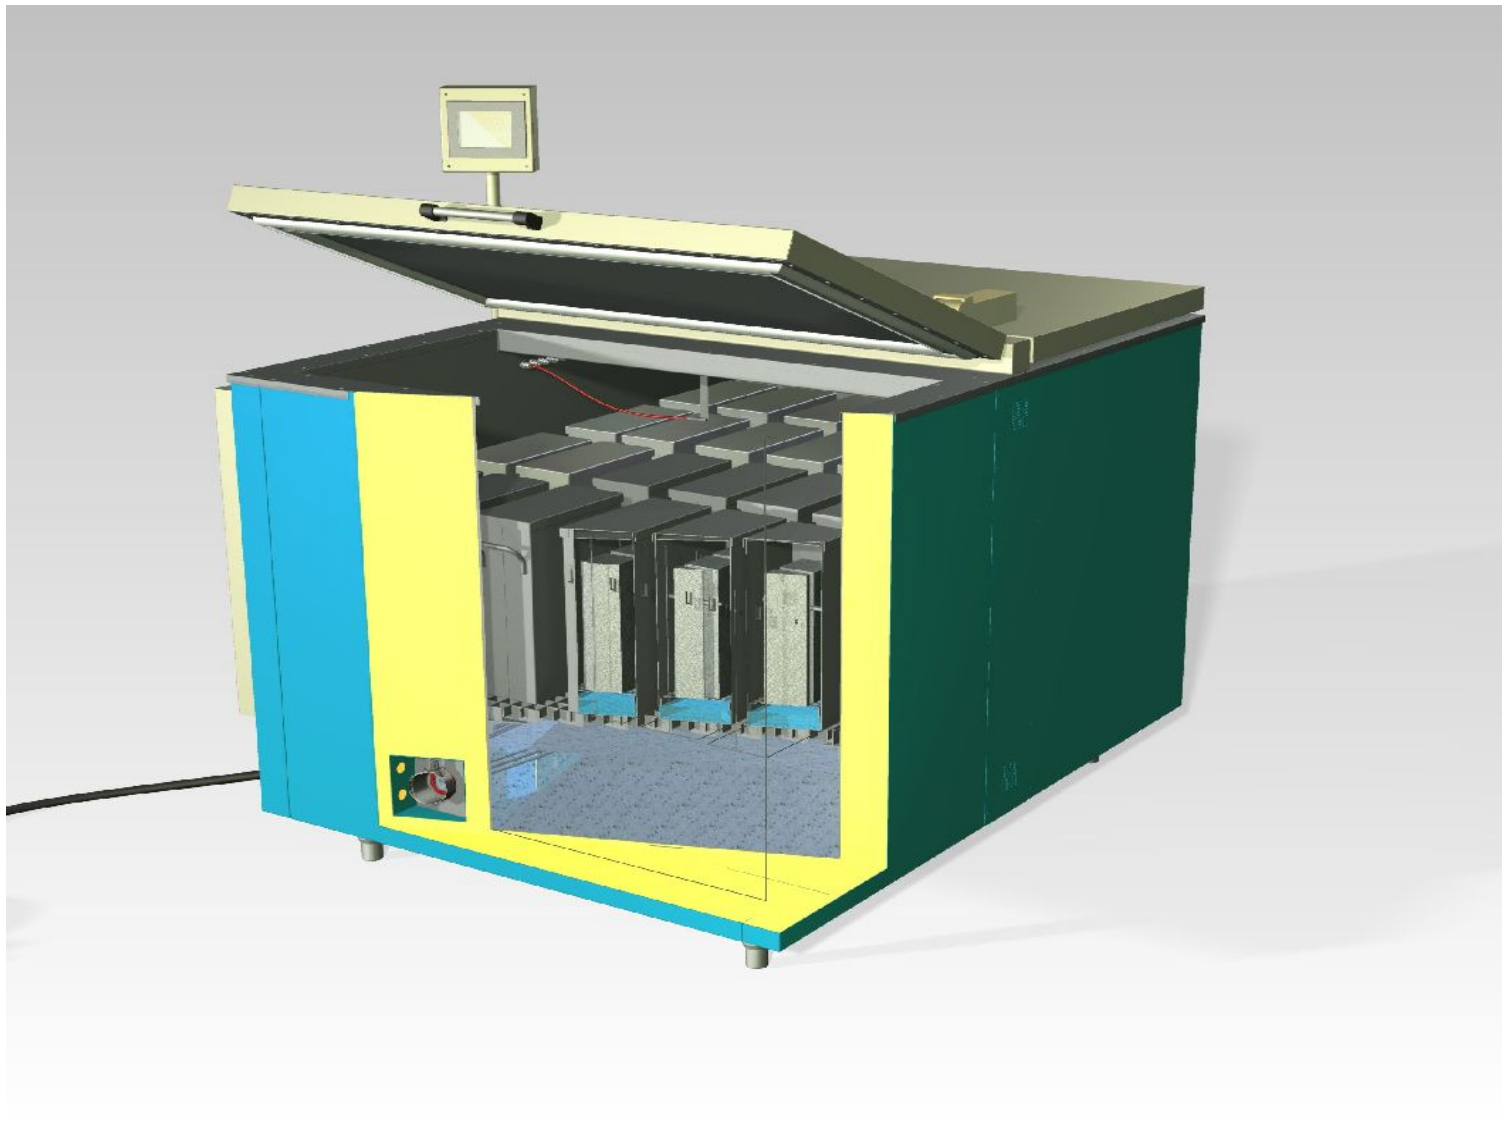

Accelerated method using 60 °C and high humidity

- German Committee for Concrete, DAFSTb (Ed.): Mitigation strategies against destroying alkali reactions in concrete: Alkali-Richtlinie, Anhang B, Teil3, Berlin: Beuth, 2007
- Standard NF P18-454 (Décembre 2004) : Béton - Réactivité d'une formule de béton vis-à-vis de l'alcali-réaction - Essai de performance - Reactivity of concrete for alkali-silica Performance test
- **RILEM Test Method TC 191-ARP (Ed.): AAR-4.1: -Detection of Potential Alkali-Reactivity-60°C Accelerated method for testing aggregate combinations using concrete prisms - Bagniaux, 2006**
